Foundational class on computing

- Basic computing concepts such as logic, graphs, and algorithmic thinking
- Novel educational approaches such as block based coding and unplugged student activities for a fun learning experience

Early Introduction of AI concepts

- We will introduce classification, training/testing, data bias, AI ethics with the help of educational tools such as teachable machines etc.
- We don't allow students to use commercial AI tools (e.g. ChatGPT) in our classes.

High quality teaching staff

- Curriculum caters to 3rd - 5th grade students and is designed by Dr. Paul Cao, a computer science faculty of UC San Diego. Paul is also the coach of Muirlands Robotics Club at La Jolla.
